

Formatting cheatsheet — editing report text

Reference · Disruption Report · ~5 min

WHAT THIS HANDOUT IS

A one-page reference for editing slide text in the FASTR report builder. You format text using a few simple symbols — the same way you would write a quick message. You do not need to learn HTML. These symbols cover 95% of cases — the AI can handle the rest.

Headings

Symbol	What it does
# Title	Big title
## Subtitle	Subtitle
### Small heading	Small heading

Emphasis and lists

Symbol	What it does
text	Bold
<i>*text*</i>	<i>Italic</i>
- at the start of a line	Bullet
Blank line between paragraphs	Spacing

Writing tips

- Start every section with a clear heading
- One idea per paragraph
- Leave a blank line between paragraphs
- Prefer short sentences over long ones
- Keep the lead sentence punchy — the title carries the finding, the lead supports it

When you get stuck

If a layout will not behave, ask the AI directly: *"Reformat this paragraph using the same style as slide 4."* The AI knows the report builder's conventions and can handle the symbols for you.
